

CEO Q&A; Cheat Sheet

Internal reference for MITRIXS — not for distribution

Why not fix current sales software?

It doesn't support distributor PDF ingestion. We build the missing layer; integration can follow.

Can you handle all 48 distributors?

Yes, incrementally. Go-live with highest-volume templates; add 2–4 per week.

What if accuracy isn't 100%?

Exceptions go to review; mappings are reused. Target ≥ 85 –90% auto-match on mature templates.

What about data security?

RBAC, encrypted storage, audit logs, HTTPS. Enterprise baseline in Phase 1.

Why MITRIXS?

Working demo on your PDFs and SSR; your team tested it. Low-risk Phase 1 extension.

ERP concerns?

Phase 1 is reporting only. Future modules are optional.

What's the risk?

Low: POC done, phased payments, UAT before final payment.
