

MEDICRONIS — Automated Distributor Sales Reporting

Executive Summary · MITRIXS · 03 August 2026

Problem

Medicronis receives sales reports from 48+ distributors as PDFs in inconsistent formats. Staff manually process these documents full-time before SSR and management reports can be produced — causing delays, errors, and no centralized sales view.

Solution (Phase 1)

MITRIXS proposes a Distributor Sales Intelligence Platform that ingests PDFs, extracts and standardizes data, maps products to your master catalog, and generates SSR automatically — with human review only for exceptions.

Proof

A working demo was built on Medicronis sample PDFs and SSR format. Your team tested the system for 2–3 days ([Start Date] to [End Date]).

- • [Insert 2–3 bullet outcomes from trial]
- • [Insert user feedback quote]

Phase 1 Deliverables (6–8 weeks)

PDF upload & processing · Product matching · Validation workflow · SSR generation · Excel/PDF export · Basic dashboard · User roles & audit trail · Go-live with top 10–15 distributor templates

Investment

[Total amount] in three milestones: 30% kickoff / 40% core delivery / 30% go-live

Expected Return

Recover ~150+ staff hours/month · Same-day SSR · Reduced mapping errors · Foundation for future sales analytics

Decision Requested

Approve Phase 1 to begin formal development and production deployment.
